Austin, TX | (972) 559-0364 | ishasingh1018@gmail.com

PROFESSIONAL SUMMARY

- Business Intelligence & AI Product Analyst with 4 years of experience spanning dashboard development, product analytics, and AI-augmented workflows across healthcare, SaaS, and pharmaceutical supply chain environments.
- Skilled in building automated data pipelines and enterprise dashboards (Power BI, Tableau, Excel) alongside product analytics (funnel, cohort, retention analysis), translating ambiguous business questions into decisions stakeholders trust.
- Hands-on experience integrating AI into analytics workflows: regression-testing outputs across multiple LLMs, using Claude with MCP servers for data modeling, and architecting a multi-agent AI reasoning system (ClauseGuard) for contract risk analysis.
- M.S. in Business Analytics with a personal project portfolio spanning sales performance analytics, workforce/HR analytics, and B2B product retention analysis, demonstrating range across BI, product, and people analytics domains.

TECHNICAL SKILLS

- Business Intelligence & Visualization - Power BI (DAX, Power Query, M Code, RLS), Tableau, Microsoft Excel (Advanced, Pivot Tables), Data Storytelling
- Product & Growth Analytics - Funnel & Cohort Analysis, A/B Testing, Amplitude, Retention Analysis, PRD Writing, RFM Segmentation
- AI & Automation - Claude (MCP Integration), Prompt Engineering, Multi-LLM Evaluation, Azure AI Foundry, Azure AI Search, Foundry IQ, REST API Integration
- Data Engineering & Quality - SQL (Window Functions, CTEs, Complex Joins), Python (Pandas, NumPy), Microsoft Fabric, ETL/ELT Pipelines, Data Validation, Data Governance
- Delivery - Stakeholder Requirements Gathering, Agile/Scrum, UAT Planning & Execution, Jira, Git/GitHub

PROFESSIONAL EXPERIENCE

Renaions | Austin, TX

Feb 2026 – Present

Business Intelligence Analyst

- Partnered with product and engineering stakeholders to gather requirements, then regression-tested a 7-segment AI scoring pipeline across multiple LLMs to validate output quality, before deploying the production pipeline via Groq API for backend routing, reducing manual evaluation by 100%.
- Designed a 4-tier XP progression system and 7-badge gamification schema through iterative stakeholder review; translated the blueprint into an interactive prototype using Claude Design; led UX dashboard build (Figma & Power BI) for streak tracking, achievement badges, and weekly goals tracking Feature Activation and DAU signals.
- Deployed automated data integration pipelines via Kaggle API and custom JSON keyword mapping schemas; optimized profile-matching algorithms to surface 3 automated recommendations per profile, eliminating all manual curation.

Simpladent Healthcare | India

Jun 2022 – Dec 2023

Business Analyst

- Facilitated 15+ stakeholder workshops to elicit and document requirements for migrating clinic reporting from manual, Excel-based processes to Power BI, translating business objectives into process flows and technical specifications across 3 clinic locations.
- Eliminated 160 manual engineering hours/month by building advanced DAX calculations, M code parameters, and optimized Power Query ETL transformations.
- Optimized complex SQL script executions across 10K+ operational records; isolated structural workflow bottlenecks to deliver a 15% backend process efficiency improvement and 12% client retention gain.
- Translated business requirements into functional data specifications, schema blueprints, and comprehensive UAT scripts across 4 major SDLC pipeline deployments; achieved 98% on-time delivery.

Snehlife Pharmaceutical Pvt. Ltd. | India

Mar 2019 – Aug 2020

Data Analyst

- Standardized data formatting and naming conventions across 15 regional markets to resolve recurring data mismatches, partnering with data engineering teams to ensure consistent, accurate inputs into the reporting pipeline.
- Deployed 12+ Tableau and Power BI dashboards tracking supply chain KPIs across 15 regional markets; engineered early-detection logic that reduced inventory shortfalls by 22%.
- Built SQL pivot analyses, standardized ETL workflows, and data entry validation frameworks; improved data accuracy by 30%, cut reporting turnaround by 25%, and saved 15 analyst hours/week.

Snehlife Pharmaceutical Pvt. Ltd. | India

Aug 2018 – Feb 2019

Data Associate

- Managed data entry validation frameworks and foundational SQL lookups to support regional supply chain reporting pipelines.

PROJECTS

ClauseGuard — AI Contract Risk Navigator | Microsoft Agents League Hackathon 2026 | GitHub

- Architected and deployed a multi-agent reasoning pipeline on Azure AI Foundry grounded in Foundry IQ (Azure AI Search); engineered data extraction logic to classify contract clauses at HIGH/MEDIUM/LOW risk, calculating financial exposure for \$390,000 across 3 contracts in under 30 seconds.
- Designed a 4-step multi-agent reasoning chain across 5 intent types; executed iterative prompt engineering and pipeline evaluation across 4 agent versions to optimize structured data output quality.

B2B SaaS Product Analytics Case Study | Amplitude · Figma · Notion · Claude AI

- Conducted funnel, cohort, and behavioral segmentation analysis across 400k+ B2B SaaS users in Amplitude, identifying a 72% activation drop-off and the critical activation event driving retention; proved the retention gap was in-product, not acquisition channel.
- Built a product analytics dashboard with custom monitoring criteria and automated weekly alerts; designed a contextual onboarding wireframe in Figma and wrote an engineering-ready PRD targeting Week 1 retention lift.

Automated Data Quality & AI Readiness Assessment Platform | GitHub

- Engineered a Python data quality framework scanning 10,234 records; flagged 15,540 structural data issues pre-production and raised pipeline reliability from 97.46% to 99.11%, eliminating 200+ monthly manual validation hours.
- Automated quality-check scorecards and data governance reporting workflows to establish clean, AI-ready data pipelines, removing all ad hoc validation requests from production.

EDUCATION

Master of Science in Business Analytics, May 2024 – Dec 2025

East Texas A&M University, TX

CERTIFICATIONS & TRAINING

- Microsoft Fabric Analytics Engineer (DP-600) — Exam Scheduled 2026 | Training Completed
- Machine Learning with Python (2024)
